

The Federal Communications Commission

Dear The Federal Communications Commission,

The proposal that would change how charges are made to the Universal Service Fund is just not fair.

Under the proposal you are considering, people who make few or no calls would pay the same as people who make many calls. The USF fund should not be the same for low-volume users as for high-volume residential or business customers. This is unfair!

We use our wireless phone primarily for safety, one phone in each vehicle. The phones are seldom used, but are there in case of emergency. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Sincerely, Boyd Briskin

Sincerely,

Boyd Briskin
